SUMMARY

B.Tech Computer Science student with a strong foundation in Python and C++, building full-stack and AI-powered systems. Experienced in backend engineering, REST APIs, and machine-learning applications, with a growing focus on LLM evaluation and reliable AI engineering.

PROJECTS

HireSense AI | AI-Powered Recruitment & Placement Platform

- Architected a full-stack recruitment and placement platform connecting students, recruiters, companies, and colleges using React.js, TypeScript, Node.js, Express.js, MongoDB, and Mongoose.
- Implemented secure JWT authentication and role-based access control across Student, Recruiter, TPO, and Admin roles, with bcrypt password hashing, Zod validation, and protected REST APIs.
- Building the AI engineering layer with LLM-based resume analysis, RAG-based retrieval over placement and job knowledge, and ML-assisted candidate-job matching, integrated with the platform's structured recruitment and resume-processing pipeline.

FARM2Market | AI-Enabled Agri-Commerce Platform

- Engineered a full-stack agri-commerce marketplace integrating a machine learning-based fruit quality classifier and a data-driven price-prediction model to support fair, informed crop pricing.
- Built and integrated an image-analysis pipeline to assess produce freshness and grade, applying ML inference within a production-style full-stack application.

EduPortal | Hybrid Database College Management System

- Developed a full-stack college academic management system using Node.js, Express.js, PostgreSQL, MongoDB, and REST APIs, implementing JWT authentication, role-based access control, and complete CRUD operations for marks, attendance, leave requests, and course materials.
- Designed a hybrid PostgreSQL–MongoDB architecture with automated GPA calculation, audit logging, and cross-database synchronization for leave approvals and attendance records.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, Java, C, TypeScript

Web & Backend: React.js, Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL, PostgreSQL, Cassandra, Redis

Developer Tools: Git, GitHub, Linux, Docker, Postman, VS Code

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

AI/ML: Machine Learning, Deep Learning, CNN, Computer Vision, Recommendation Systems, scikit-learn, TensorFlow, OpenCV, Pandas, NumPy, Matplotlib, Seaborn

ACHIEVEMENTS AND CERTIFICATION

- Solved 200 Data Structures & Algorithms problems.
- Getting Started with Artificial Intelligence — IBM SkillsBuild

EDUCATION

B.Tech in Computer Science Engineering | Kolhapur Institute of Technology

CGPA: 7.6 / 10.0

2023 – 2027

12th Grade | SRM Welkin Higher Secondary School, Sopore

83%

10th Grade | SRM Welkin Higher Secondary School, Sopore

98%

LANGUAGES

English (Professional Proficiency) • Urdu/Hindi (Native or Bilingual Proficiency) • Kashmiri (Native Proficiency)
